

# WAE WATERMAKER PRO™

Our Green is Blue

Anytime water (ATW) Vending Stations  
Ideal for manufacturing units, workplaces,  
communities & public facilities

## Pure water anytime

WAE WaterMaker Pro™ vending station, dispenses pure drinking water conforming to BIS 10500 standards. An ideal and economical alternative to expensive bottled water. Capable of purifying water from any source.

## Versatile Water Vending Stations

The WAE WaterMaker Pro™ comes with three core advantages:

### Environment Friendly: 80% Water Recovery

Low water rejection during purification process: An innovative proprietary device ROVPD integrated with membrane array reduces water rejection to 20%.

### Smart Operation

WAE WaterMaker Pro™ has hybrid dispensation system enabling manual and coin-operated or smart card operated dispensing that makes it easy to operate in hinterlands reducing reliance on expensive bottled water. Provide water on 'Pay per Use' basis, as & when required.

### Remote Monitoring

GSM/SMS alert system allows monitoring & controlling WAE WaterMaker Pro™ through GSM interface. Real time monitoring to track sales/operation remotely.

### Solar Powered

Solar ready system to allow for energy independence from unreliable grid for continuous water supply.
